## **Real Estate Tokenization - Challenges and Opportunities in Hong Kong**

**Rajkumar Kanagasingam**

*Founder President, Fintech Association of Sri Lanka (FASL) and  
Founder & CEO of Ambuli International*

**Friday, 21 June 2019**

**12:30 - 1:30 pm**

**Academic Conference Room, 11/F Cheng Yu Tung Tower  
The University of Hong Kong**

Securities-based token issuance (STO) has become a hot topic in the virtual asset market. Many financial institutions are studying how to implement asset tokenization to release asset value. The real estate tokenization project will become a future trend, and the potential has “no limit” and has a better scope in Hong Kong.

**Rajkumar Kanagasingam** is the Founder President of Fintech Association of Sri Lanka (FASL) and Founder & CEO of Ambuli International, a consultancy firm focusing on the applications of blockchain, cloud computing, artificial intelligence and big data in the financial and other sectors, and currently exploring tokenization of securities in real estates. Rajkumar has delivered speeches on Security Token Offering (STO) at various forums including Finners City in Shanghai and moderated recently a panel discussion titled ‘The Challenge, Opportunity and Solution of STO’ at the ‘Chain Plus: Asia-Pacific Blockchain New Finance Summit’ in Singapore, where eminent crypto/finance entrepreneurs and professionals were panelists including Jacqueline Kwok, Director (Asia) at Securitize, a San Francisco-based compliance platform and protocol for issuing and managing digital securities on the blockchain and Thomas Borrel, Chief Product Officer at Polymath, a Toronto based decentralized platform that makes it easy to create security tokens and conduct security token offerings.
